This application must be completed and submitted along with the fee and any supporting documentation for <u>each</u> site to be evaluated.

Once all documentation is submitted, the Health Department will conduct a site visit to determine compliance. If the site visit is satisfactory then a permit will be issued for the site. The septage land application site permit is valid for one year. Each disposal site must be approved (permitted) by the Darke County General Health District prior to any dumping at the site.

If you have a disposal site located outside of Darke County, include a letter of approval or copy of the permit from the regulatory authority for these sites.

The operation permit fee for experimental systems will be based upon the type of system and the number of inspections necessary to complete the operation permitting requirements.

For home sale request: Whereas, the O&M monitoring is not complete (they've paid: the Health Dept. has not done monitoring yet) or O&M completed within the last year by a Sanitarian (Health Department inspection deemed in compliance; must provide satisfactory pumping receipt dated within last year) (We would not have to go back out, just complete letter): The fee will be reduced by the amount paid previously for the O & M permit.
