

FOOD DELIVERY SAFETY

Delivering Food Safely

- 1** Keep the inside of your vehicle clean and pest-free
- 2** Check that food packaging is intact so it's protected from contamination
- 3** Keep raw foods, allergenic foods, and chemicals separate from one another
- 4** If delivery will take longer than 30 minutes, take steps to control food temperature
 - Use a refrigerated vehicle, cooler, or thermal blanket to help control food temperature
- 5** If you are feeling sick, don't deliver food

Receiving a Delivery Safely

- 1** Schedule the delivery for a time that you're home so you can eat or put away food items immediately
- 2** If you are sick or worried about your health, arrange for contactless delivery
- 3** Check the temperature of food upon arrival
 - Look for signs that frozen food has begun to thaw
- 4** Wash your hands before eating or after putting away food items
