

Measles

IT ISN'T
JUST A
LITTLE
RASH

Measles can be dangerous,
especially for babies and
young children.

MEASLES SYMPTOMS TYPICALLY INCLUDE

- High fever (may spike to more than 104° F)
- Cough
- Runny nose
- Red, watery eyes
- Rash breaks out 3-5 days after symptoms begin

Measles Can Be Serious

About 1 out of 4
people who get
measles will be
hospitalized.

1 out of every 1,000 people
with measles will develop
brain swelling due to infection
(encephalitis), which may lead
to brain damage.

1 or 2 out of 1,000
people with measles
will die, even with
the best care.

You have the power to protect your child.

Provide your children with **safe** and **long-lasting protection** against measles by making sure they get the **measles-mumps-rubella (MMR) vaccine** according to CDC's recommended immunization schedule.

Children need to receive MMR at 12-15 months of age and again at 4-6 years for best protection.

**Walk-in Measles Vaccinations, Tuesdays 8 - 10:30 am
and 2- 5:00 pm, 300 Garst Avenue, Greenville**

Call (937) 548-4196 for more information.
